PROFESSIONAL SUMMARY

Bachelor of Computer Engineering Graduate from Telkom University with strong technical expertise and practical experience in Cyber Security, Digital Forensics, and Web Application Security. Proven track record as a Digital Forensics Intern at the Directorate of Cyber Crime Investigation (Ditres Siber), Jakarta Metropolitan Police. Served for one year as a Teaching Assistant at the Security Laboratory. Experienced in conducting security assessments and implementing web application defenses based on OWASP Top 10 standards, possessing dual competencies in penetration testing/remediation (Blue Team) and digital forensics investigation (DFIR).

WORK EXPERIENCE

Digital Forensics Intern - Directorate of Cyber Crime Investigation (Ditres Siber), Jakarta Metropolitan Police

Jakarta, Indonesia | June 2025 – August 2025

- Received direct mentorship from senior investigators and digital forensics experts in learning digital investigation methodologies according to police standard operating procedures.
- Intensively trained in compiling digital forensics investigation reports compliant with forensic documentation standards and legal admissibility.
- Assisted investigators in digital forensics investigation processes adhering to digital evidence methodologies.
- Executed digital evidence acquisition and preservation while ensuring data integrity and chain of custody.
- Analyzed Windows Registry, SQL Databases, file systems, digital storage media, and mobile devices under expert supervision.
- Utilized FTK Imager, Magnet ACQUIRE, Autopsy, Andriller, Registry Explorer, SQLite Database Browser, and OSForensics during investigations.
- Drafted digital forensics investigation reports following police documentation standards.
- Collaborated with law enforcement investigators in digital evidence analysis and validation.

Teaching Assistant, Security Laboratory - Telkom University

Bandung, Indonesia | Period: Semester 7 – Semester 8

- Instructed System Security and Operating System laboratory practicums for undergraduate students.
- Explained technical course materials and guided students through hands-on case studies.
- Assisted in practicum execution, assignment grading, and student performance evaluation.
- Served as Research Lead & Advisor for junior members within the Digital Forensics Research Division, formulating research topics tailored to individual technical skill sets.
- Mentored and coached junior students throughout research execution, supervising study on "Comparative Study of Three Windows Registry Analysis Tools in Digital Forensic Investigations."
- Co-authored and developed the official 101-page CSE-410 Digital Forensics laboratory manual (12 hands-on modules) in direct collaboration with the Seculab Advisor Lecturer for Telkom University curriculum.

Core Team & Financial-Inventory Officer – Lakeside Fit+ (CAATIS Telkom University)

Bandung, Indonesia | February 2024 – October 2024

- Managed daily operational financial accounting, including revenue recording, expenditure tracking, and cashbook reporting under CAATIS Telkom University enterprise unit.
- Executed daily inventory audits of raw material stocks (fresh fruits, sweeteners, and supplies) to prevent stock-out incidents and enforce loss prevention.
- Coordinated outlet operations and customer service delivery, ensuring workflow efficiency and high product quality for university campus stakeholders.

EDUCATION

Telkom University

Bachelor of Engineering (S.T.) in Computer Engineering | 2022 – 2026

SMA Negeri 2 Kota Bekasi

Science Major (MIPA) | 2019 – 2022

CERTIFICATIONS

- DFIR Foundations & Techniques: Professional Skills and Readiness – Blue Cape Security (2026)

- OSForensics Triage Certification – PassMark Software (2025)
- Introduction to Digital Forensics – Security Blue Team (2025)
- Liaison Officer Certificate of Appreciation – Security Laboratory Study Group, Telkom University (2025)
- Cisco Networking Academy Certificate – Cisco (2026)
- Introduction to Information Security – Cyber Academy (2026)
- Classical Cryptography for Beginner – Cyber Academy (2026)
- Digital Forensics – OpenLearn, The Open University (2025)

KEY PROJECTS & ACHIEVEMENTS

Security Analysis and Implementation for Pineus Tilu Reservation Website Based on OWASP Top 10 (Undergraduate Capstone Design)

Role: Blue Team – Lead Security Implementation & Remediation | Telkom University

- Architected and implemented 13+ backend security features including Multi-Factor Authentication (OTP), Role-Based Access Control, Web Application Firewall, and Audit Logging aligned with OWASP Top 10.
- Implemented 5 HTTP Security Headers (HSTS, X-Frame-Options, X-Content-Type-Options, Referrer-Policy, Permissions-Policy) to mitigate Man-in-the-Middle, Clickjacking, and MIME Sniffing attacks.
- Engineered an automated threat detection system for SQL Injection, XSS, IDOR, and Web Scraping using custom middleware with rate-anomaly detection (>50 requests/min).
- Developed Dual-Layer Password Security (backend validation + real-time frontend strength meter) with k-Anonymity breach detection to prevent compromised password usage.
- Designed an OTP authentication system utilizing CSPRNG, Bcrypt hashing, 15-minute auto-expiry, and comparative validation against RFC 4226 (HOTP), RFC 6238 (TOTP), and RFC 6287 (OCRA) - achieving 100% match with RFC Test Vectors.
- Conducted performance benchmarking of OTP algorithms (50 iterations + statistical analysis: Mean, StdDev, CV%) to inform production deployment decisions.
- Secured Midtrans payment gateway integration with SHA-512 signature validation, constant-time comparison, and API cross-verification to prevent Webhook Spoofing.
- Built a real-time security alerting system integrated with Telegram Bot for CRITICAL/WARNING incident notifications (Brute Force, SQL Injection, IDOR) featuring attacker GeoIP tracking.
- Enforced audit log retention policies compliant with ISO 27001 and anti-repudiation principles, protecting active 1–89 day forensic evidence from tampering while restricting pruning to logs >90 days old via 3-layer automated and manual mechanisms.

CSE-410 Digital Forensics Course Curriculum & Laboratory Module Development (101 Pages)

Role: Co-Author & Lead Technical Developer | Security Laboratory, Telkom University

- Co-authored and developed the official 101-page CSE-410 Digital Forensics laboratory manual in direct collaboration with the Seculab Advisor Lecturer for Telkom University.
- Engineered 12 hands-on modules covering Chain of Custody (SHA-256), YARA rules, Android ADB/SQLite forensics, EVTX/Linux log analysis, Plaso super-timelines, and Wireshark/Zeek network analysis.
- Validated all forensic toolchains (Autopsy, FTK Imager, ExifTool, Chainsaw) and lab environments to ensure 100% scenario reproducibility.

TECHNICAL SKILLS

Cyber Security: Web Application Security, OWASP Top 10, Vulnerability Assessment, Security Testing, Secure Coding, Role-Based Access Control (RBAC), Web Application Firewall (WAF), HTTP Security Headers & CSP, Multi-Factor Authentication (OTP/2FA), Cryptographic Hashing (Bcrypt, SHA-512), Payment Gateway Security, Security Incident Response

Digital Forensics: Digital Evidence Acquisition, Digital Evidence Preservation, Windows Forensics, Mobile Device Forensics, Windows Registry Analysis, Browser Artifact Analysis, SQL Database Investigation, Event Log Analysis, File System Analysis, Chain of Custody, Digital Investigation Reporting

Tools & Forensics Software: FTK Imager, Autopsy, OSForensics, Magnet ACQUIRE, Registry Explorer, Andriller, SQLite Database Browser, Burp Suite, Git, Kali Linux, WSL (Windows Subsystem for Linux)

Programming & Database: PHP, JavaScript, Laravel, MySQL

SOFT SKILLS

Analytical Thinking, Critical Thinking, Problem Solving, Communication, Teamwork, Time Management, Research Skills, Adaptability

ORGANIZATION & LEADERSHIP

Centurion HMTK – Esports Division Lead (FIFA Tournament)

Computer Engineering Student Association (HMTK), Telkom University | 2024

- Spearheaded end-to-end tournament operations for the FIFA Esports competition, overseeing match bracket structure, scheduling, and participant polling systems.
- Formulated competition guidelines, fair-play rulebooks, and technical dispute protocols to maintain competitive integrity and ensure zero-disruption match flow.
- Managed multi-stage match schedules and coordinated dozens of participants, achieving 100% on-time and incident-free tournament execution.

Connection HMTK – Sponsorship & Community Outreach Officer

Computer Engineering Student Association (HMTK), Telkom University | 2023

- Conducted partnership prospecting and sponsor outreach for the department's annual flagship community event.
- Acted as an agile cross-functional coordinator, seamlessly supporting event logistics, operational workflow, and execution across multiple committees.
- Served as Interactive Educational Moderator & Mentor for 3rd-grade elementary students, facilitating hands-on basic technology logic and educational game-creation sessions.

Indonesian Digital Forensics Association (AFDI)

Official Member | May 2026 – Present

- Active registered member participating in professional seminars, webinars, and competency development activities in Digital Forensics.
