PROFESSIONAL SUMMARY

Bachelor of Computer Engineering (S.T.) graduate from Telkom University with technical expertise and practical experience in Cyber Security, Digital Forensics (DFIR), and Web Application Security (OWASP Top 10). Experienced as a Digital Forensics Intern at the Directorate of Cyber Crime Investigation (Ditres Siber), Jakarta Metropolitan Police (Polda Metro Jaya), and a Practicum Assistant and Research Advisor at the Security Laboratory, Telkom University. Experienced in security assessment, vulnerability remediation (Blue Team), and digital forensic incident investigation, and registered as an Official Member of the Indonesian Digital Forensics Association (AFDI).

WORK EXPERIENCE

Digital Forensics Intern – Directorate of Cyber Crime Investigation (Ditres Siber), Jakarta Metropolitan Police

Jakarta, Indonesia | June 2025 – August 2025

- Received direct mentorship from senior investigators and digital forensics experts in learning digital forensics investigation methodologies compliant with police standard operating procedures.
- Intensively trained in compiling digital forensics analysis reports in accordance with investigation documentation standards and legal admissibility.
- Assisted investigators in digital forensics investigation processes by applying strict digital evidence handling methodologies.
- Executed digital evidence acquisition and preservation while maintaining data integrity and Chain of Custody.
- Analyzed Windows Registry, SQL databases, file systems, digital storage media, and mobile devices under expert supervision.
- Operated FTK Imager, Magnet ACQUIRE, Autopsy, Andriller, Registry Explorer, SQLite Database Browser, and OSForensics in the investigation process.
- Drafted digital forensics examination reports following police documentation standards.
- Collaborated with investigators in validating and analyzing digital evidence findings.

Practicum Assistant & Research Advisor, Security Laboratory – Telkom University

Bandung, Indonesia | Period: Semester 7 – Semester 8

- Instructed System Security and Operating System practicums for undergraduate Computer Engineering students.
- Explained technical course materials and guided students through practical hands-on case studies.
- Assisted in practicum execution, assignment grading, and student academic performance evaluation.
- Mentored and guided junior students during research execution, supervising a comparative study of three Windows Registry analysis tools in digital forensic investigations.
- Co-authored and developed the official 101-page CSE-410 Digital Forensics laboratory manual (12 practicum modules) in direct collaboration with the Seculab Advisor Lecturer for the Telkom University curriculum.

EDUCATION

Telkom University

Bachelor of Engineering (S.T.) in Computer Engineering | 2022 – 2026

SMA Negeri 2 Kota Bekasi

Science Major (MIPA) | 2019 – 2022

CERTIFICATIONS & PROFESSIONAL CREDENTIALS

Professional & Industry Credentials:

- AFDI Official Registered Member – Indonesian Digital Forensics Association (2026)
- Intro to DFIR: The Divide and Conquer Process – Cyber Triage & Sleuth Kit Labs (2026)
- Forensic and Integrity Services Job Simulation – EY (Ernst & Young) via Forage (2026)
- OSForensics Triage Certification (OSFTC) – PassMark Software (2025)
- Introduction to Digital Forensics – Security Blue Team (2025)
- Introduction to Cybersecurity – Cisco Networking Academy (2026)

Technical Training & Specializations:

- IT Audit Fundamentals & Professional Standards – Codelamp Indonesia (2026)
- C5W-100 Introduction to Digital Forensics – Cyber 5W (2026)
- Digital Forensics Basics – Cybrary (2026)

- DFIR Foundations & Techniques – Blue Cape Security (2026)
- Digital Forensics – OpenLearn, The Open University (2025)
- Information Security & Cryptography – Cyber Academy (2026)

KEY PROJECTS & ACHIEVEMENTS

Security Analysis and Implementation for Pineus Tilu Reservation Website Based on OWASP Top 10 (Undergraduate Capstone Design)

Role: Blue Team – Lead Security Implementation & Remediation | Telkom University

- Architected and implemented 13+ backend security features including Multi-Factor Authentication (OTP), Role-Based Access Control, Web Application Firewall, and Audit Logging aligned with OWASP Top 10 standards.
- Implemented 5 HTTP Security Headers (HSTS, X-Frame-Options, X-Content-Type-Options, Referrer-Policy, Permissions-Policy) to mitigate Man-in-the-Middle, Clickjacking, and MIME Sniffing attacks.
- Built an automated threat detection system for SQL Injection, XSS, IDOR, and Web Scraping vulnerabilities using custom middleware with rate-limit anomaly detection (>50 requests/min).
- Developed dual-layer password security (backend validation + real-time frontend strength indicator) with k-Anonymity breach detection to prevent compromised password usage.
- Designed an OTP authentication system utilizing CSPRNG, Bcrypt hashing, 15-minute expiry time, and comparative testing against RFC 4226 (HOTP), RFC 6238 (TOTP), and RFC 6287 (OCRA) standards - achieving 100% compliance with RFC Test Vectors.
- Conducted performance benchmarking of OTP algorithms (50 iterations + statistical analysis: Mean, Standard Deviation, CV%) as the basis for production deployment decisions.
- Secured Midtrans payment gateway integration using SHA-512 signature validation, constant-time comparison, and API cross-verification to prevent Webhook Spoofing.
- Built a real-time security alerting system integrated with Telegram Bot for CRITICAL/WARNING incident notifications (Brute Force, SQL Injection, IDOR) equipped with attacker GeoIP tracking.
- Implemented audit log retention policies compliant with ISO 27001 standards and anti-repudiation principles, protecting active 1–89 day forensic evidence from tampering while restricting pruning only to logs >90 days old via 3-layer automated and manual mechanisms.

CSE-410 Digital Forensics Course Curriculum & Laboratory Manual Development (101 Pages)

Role: Co-Author & Lead Technical Developer | Security Laboratory, Telkom University

- Co-authored and developed the official 101-page CSE-410 Digital Forensics laboratory manual in direct collaboration with the Seculab Advisor Lecturer for the Telkom University curriculum.
- Designed 12 practicum modules covering Chain of Custody (SHA-256), YARA Rules, Android ADB/SQLite forensics, EVTX/Linux log analysis, Plaso super-timelines, and Wireshark/Zeek packet analysis.
- Conducted technical validation on all forensic toolchains (Autopsy, FTK Imager, ExifTool, Chainsaw) to guarantee 100% case study reproducibility.

TECHNICAL SKILLS

Cyber & Cloud Security: Web Application Security, OWASP Top 10, Cloud Security Fundamentals (GCP/AWS Concepts), Vulnerability Assessment, Web Application Firewall (WAF), Security Incident Response, HTTP Security Headers, Multi-Factor Authentication (OTP/2FA), Bcrypt/SHA-512 Cryptographic Protection, Payment Gateway Security, RBAC Enforcement

Digital Forensics & IR: Digital Evidence Acquisition & Preservation, Chain of Custody, Windows Forensics, Mobile Device Forensics, Registry & Event Log Analysis, Browser Artifact Analysis, SQL Database Forensics, File System Analysis, Forensic Reporting

Tools & Software: FTK Imager, Autopsy, OSForensics, Magnet ACQUIRE, Registry Explorer, Andriller, SQLite Browser, Burp Suite, Wireshark, Git, Kali Linux, WSL

Programming & Databases: PHP, JavaScript, Laravel, MySQL, HTML5/CSS3, Python Basics

SOFT SKILLS

Analytical Thinking, Critical Thinking, Problem Solving, Communication, Teamwork, Time Management, Research Skills, Adaptability

ORGANIZATION & LEADERSHIP

Centurion HMTK – Esports Division Lead (FIFA Tournament)

Computer Engineering Student Association (HMTK), Telkom University | April 25 – May 2025

- Spearheaded end-to-end tournament operations for the FIFA esports competition, overseeing match bracket structure, scheduling, and participant polling systems.
- Formulated competition guidelines, fair-play rulebooks, and technical dispute resolution protocols to maintain competitive integrity.
- Managed multi-stage match schedules and coordinated dozens of participants, achieving 100% on-time and incident-free tournament execution.

Connection HMTK – Sponsorship & Community Outreach Staff

Computer Engineering Student Association (HMTK), Telkom University | December 2023 – October 2024

- Conducted partnership prospecting and sponsor fundraising for the department's main annual event.
- Acted as a responsive cross-divisional coordinator supporting event logistics, operational workflow, and execution across multiple committees.
- Served as Educational Moderator & Interactive Mentor for 3rd-grade elementary students, facilitating basic technology logic learning sessions and educational game creation.

Indonesian Digital Forensics Association (AFDI)

Official Registered Member | May 2026 – Present

- Active registered member participating in professional seminars, webinars, and competency development activities in Digital Forensics.
